

**ASET Certificate in the Control of Infection and
Contamination**

Information Sheet

Introduction to Cable Educational Ltd

Cable Educational Ltd was founded 20 years ago by two experienced teachers Bill Massey and Kay Holder. Originally set up to produce learning materials for the Secondary School sector, Cable has expanded to include the publishing of materials which support the delivery work based and distance learning by Colleges of Further Education, private training providers and employers.

In 2002 Andrew Sellers was appointed Director of Further Education. The contribution of Andrew has brought rapid development in this area. Over the past 4 years, working closely with nationally recognised awarding bodies such as Edexcel, OCNW, CACHE, IOSH and RIPH, the company has produced more than 20 learning packages which support nationally recognised qualifications.

Cable Materials

Over 20 years Cable has developed a unique style which has proved to meet the needs of students. Our research into the average worker needing a level 2 qualification has ensured the materials are written in a style that will increase confidence and aid candidates to a smooth achievement.

ASET Certificate in the Control of Infection and Contamination

Unit 1

Introduction to Infection Control Healthcare Environments

This unit looks at the different types of micro organisms that can cause infection, and how these can be transmitted and the potential risks in a care environment. It will help candidates know where to find information about infection control and how to keep this knowledge up to date.

Unit 2

Personal Healthcare and Hygiene Procedures in Healthcare

In this unit candidates learn how to prevent the transmission of infections by implementing personal healthcare and hygiene measures. These include personal hygiene actions, wearing appropriate clothing, effective hand washing and dressing wounds.

Unit 3

The Decontamination of Healthcare Equipment and the Environment

The unit looks at the key procedures that should be used as part of everyday care of individuals in healthcare environments to minimise the transmission of infection and includes the methods used to decontaminate equipment and the environment in healthcare settings.

Who is it for?

The course has been designed for those individuals working either in paid or voluntary capacity, in roles in where there is a risk of contacting or spreading infection.

ASET Certificate in the Control of Infection and Contamination (1004419X)

Indicative Course Length 10- 12 Weeks (Example Time Line and MIS Information)

MIS

Initial Contact with candidate
Advice and Guidance
Initial Assessment
Enrolment Procedures
Induction Process
Individual Action Planning

Distance Learning Pack
Thorough written assessment and feedback

Evidence

Completed Initial Assessment
Individual Candidate Record
Completed Individual Action Plan
